2013

## PROJECT

### Note Taker

2023- Present

The project is about read, update, create and delete. it basically allow user to add Notes topic wise in the database and later can be update or delete as required. support a student's learning by providing clear and accurate notes as a record of lectures or classes. Notes are essential tools for learning and revision, therefore the work of a Notetaker provides crucial support.  
Developed Using :- HTML, CSS, Hibernate , MySQL, JAVA EE.

### Portfolio

2023- Present

A static portfolio page contains all the required information about my skill and technical skills. by using Vscod created a Static website which include my other projet also in the project sections.

### Online Expense Tracker

2023- Present

Expense trackers not only help you keep your spending in check now but also provide an auditable record of your past spending data. That gives you a lot of insight that is helpful when you're reviewing your business's books and planning for future growth.  
Developed Using :- HTML, CSS, Hibernate , MySQL, JAVA EE.
